

AUTOMOTIVE CATALOGUE 2021

WÖSSNER GROUP

WE ARE THE INNOVATIVE SPECIALISTS FOR HIGH PERFORMANCE PISTONS, CONRODS, GASKETS AND VALVES.

Our products are to be found in engines operating at the highest levels of motorsport, in competition and, of course, in everyday use – in fact, anywhere, where longevity, highest performance and operational noise are important factors. Wössner products are the source of the superior power behind the success of well known motorsport teams at national and international race meets, and with distribution points and warehouses in Europe, North America and Asia our products are just a phonecall away.

FORGING GROUP MONALE

Forging Group Monale was born in July 2009 when Mr. Wössner (owner of Wössner GmbH) bought an Italian aluminum forging company.

Considering equipment's presses and knowledge, we decided to enter in every field where forged parts are needed. We supply more than 50% abroad. We are a small company; this allowed us to give to our customers a very good service in term of reactivity, flexibility, competitiveness and quality.

We are certified ISO 9001:2015 and we adopted, from many years, the Organization Model 231.

We buy raw material in according to the Certify 3.1 and, when requested, raw material checked by Ultrasonic Test class "A" and "AA".

Alloys that we normally forge are 2014, 2024, 2618, 4032, 6060, 6082, 7003, 7020, 7022, 7055 and 7075.

We are able to produce raw parts with the complete forging process, it means that in FGM we can saw billets and below provide for pre heating, forging, trimming, heat treatment, tumbling and pickling. Quality department support the production with the Scan Laser for the dimensional check, with the automatic Crack Test equipment, with the Spectrometer and hardness equipment. We certify our forged parts and we guarantee traceability.

FGM can offer also machined and assembled parts, machining, anodizing and shot blasting. External suppliers make these. We are able to forge very small parts (few grams) as well as big parts (10/12 Kg).

Our forging presses are as follows:

- N° 3 hydraulic presses 1.000 Tons/each
- N° 1 Screw press 300 Tons
- N° 1 Screw press 600 Tons
- N° 1 Screw press 800 Tons
- N° 2 Screw presses 1.400 Tons

Every press has his pre heating oven. We have also mechanical presses from 60 Tons to 200 Tons for trimming.

70s FOUNDATION OF WÖSSNER

At the end of the 70s, Eckart Wössner starts by importing pistons into Germany.

1994

OWN PISTONS

The in-house production of forging pistons took place in the 1990s, in 1994 the foundation stone for Wössner GmbH was laid.

2003

GROWTH DEMAND

Wössner's expansive development requires an increase in the production area to fourfold in early 2003.

2005

FOUNDATION OF WÖSSNER USA WEST COAST DIVISION

Wössner Group USA expands in 2005 with the founding of Wössner USA Inc. in California.

2009

FORWARD IN MONALE

Wössner acquires its own smithy and thereby secures the quality of its metals: FGM Forging Group Monale now belongs to the Wössner Group.

2011

FOUNDATION OF WÖSSNER ITALIA

The growing demand for high-performance forging pistons led to the founding of Wössner Italia Srl. in Monale.

2015

FOUNDATION OF WÖSSNER ASIA

Headquartered in Taichung. Wössner pistons are still produced exclusively in Germany.

2016

START OF CONSTRUCTION OF THE NEW COMPANY CENTER WÖSSNER LTD.

Located at Dreispitz in Haltingen / Weil am Rhein. It was completed in February 2018.

2017

FOUNDATION OF THE WÖSSNER USA EAST DIVISION

In addition to the already established West Coast Division in California, Wössner USA expanded and founded the East Division in Ohio.

2018

COMPLETION AND MOVE INTO THE NEW HEADQUARTERS OF WÖSSNER GMBH

Wössner GmbH moves to the new headquarters in Haltingen / Weil am Rhein, significantly increasing production.

2019

40TH ANNIVERSARY

One year after moving into the new headquarters, Wössner celebrates its 40th anniversary in March 2019. What began as a one-man business developed over decades into a globally operating company, which is constantly expanding.

2020 FOUNDATION OF WÖSSNER UK

Wössner UK is founded and moves into a new facility, increasing stock and reducing lead times on deliveries.

GENERAL PISTON INSTALLATION GUIDELINES

NOTE: Piston installation guidelines are for general installation only. Always refer to the OEM service manual for critical engine data. When installation is not clear, contact your Wössner dealer or professional engine builder before proceeding.

Piston to cylinder bore clearance

Your new Wössner piston is precision machined to a very specific skirt diameter for your engine application. Piston skirt diameters are measured at a location 90 degrees from the piston pin, at a low position on the skirt near the bottom of the piston.

Wössner performance coated pistons require no adjustments to nominal piston to wall dimensions. The coating is intended to wear into the cylinder wall, and no additional clearance

should be calculated for installation. Coating thickness can be .02-.025mm (.0007 - .0010") total build up to skirt diameter.

Pistons machined to a grade size are marked on the piston box and the piston crown, the grade size will determine the skirt diameter at the largest point prior to coating. Pistons not machined to a grade size, such as some catalog pistons and custom pistons, will include the piston to wall clearance with the packaging. As a general guideline, use the chart below for general fitment only:

BORE DIAMETER	NA	NA	FORCED INDUCTION	FORCED INDUCTION
MM	CLEARANCE MM	CLEARANCE INCHES	CLEARANCE MM	CLEARANCE INCHES
70.0	.074	.0029	.084	.0033
75.0	.078	.0030	.088	.0034
80.0	.081	.0031	.091	.0035
85.0	.085	.0033	.095	.0037
90.0	.089	.0035	.099	.0039
95.0	.093	.0036	.103	.0040
100.0	.097	.0038	.107	.0042

NOTE: Larger piston to wall clearances may cause piston noise on start up. As the engine temperature increases, piston noise should be reduced as it reaches operating temperature.

Piston orientation

Your Wössner piston should be installed in the correct orientation. The piston crown may be marked with an arrow for exhaust location, a crown dimple for forward or accessory drive side location, or the valve pockets on four cycle applications will indicate proper orientation.

It is important to make certain that the piston be installed in the correct orientation, or engine damage may occur. Verify the piston orientation using the OEM service manual, or confirm with your Wössner dealer.

Piston to valve clearance

Your Wössner four stroke piston was machined to exacting valve pocket dimensions. It is important to validate that the piston to valve clearance is correct, and this can be achieved using a mock-up assembly and modeling clay. Valve to piston clearance is normally checked at +/- 10 degrees from TDC:

VALVE	INTAKE	EXHAUST	INTAKE	EXHAUST
Distance	1.5 - 2.0mm	2.0 - 2.5mm	.060 + .080"	.080 - .098"

Piston ring installation

Your Wössner piston is supplied with high performance piston rings that are specifically engineered for your engine application. It is important to inspect the piston ring end gap during installation, and make adjustment to the end gap if required.

Inspect the piston ring end gap in your cylinder, approximately 13mm (.500") down from the top of the

cylinder. Install one piston ring at a time, use the piston to assure the ring is flat and square to the cylinder bore. Ring gap can be measured using a feeler gage.

The chart below illustrates some typical ring end gap dimensions, based on general guidelines. To calculate the ring end gap, multiply the cylinder bore diameter in inches X the end gap mentioned on the chart:

APPLICATION	TOP RING	SECOND RING
NA	.0040	.0050
NA RACING	.0045	.0055
FORCED INDUCTION	.0055	.0065

NOTE: Piston ring oil rails should be a minimum gap of .35 - 1.0mm (.014 - .040").

NOTE: Three piece oil ring separators should be installed with the ends butted only, and not overlapped.

NOTE: Two piece oil rings require that the coil expander gap is located opposite of the rail end gap.

NOTE: Top and second ring axial clearance should be between .03 - .04mm (.0011 - .0015").

Wössner high performance pistons and rings require a break in period. It is best to follow OEM guidelines for break in. Synthetic oils are not recommended for break in, as these oil types may prevent the piston rings from properly wearing into the cylinder wall.

TERMS AND CONDITIONS: Due to the nature of high performance and racing applications, Wössner components are sold without express warranty or any implied warranty of merchantability or fitness for a specific purpose. Wössner shall not, under any circumstances, be liable for any specific, incidental or consequential damages, including, but not limited to, damage, or loss of property or equipment, loss of profits or revenue(s), cost of purchased or replacement goods, or claims of customers of the purpose, which may arise and/or shall result from sale, installation or use of these parts. Installation of these parts may void vehicle manufacturers warranty coverage and/or may cause the vehicle to be illegal in some countries. Please check with local laws on the road use of your vehicle. Wössner reserves the right to make product improvements and changes without incurring liability with respect to similar products previously manufactured. By using these parts you are accepting these terms and conditions.

CONNECTING ROD INSTALLATION GUIDELINES

NOTE: The guidelines below are not a substitute for a professional engine builders experience with particular applications. Always seek advice from a professional engine builder if in doubt.

The following guidelines are for those who have purchased the PEC H-Beam or PEC Racing connecting rods.

General Guidelines

- Before use the connecting rods should be checked that they are correct for your application. This means checking that critical dimensions are correct. Note that some dimensions may be different to the OEM connecting rod depending on piston application.
- Before removing the rod end caps, please mark their orientation and number the rods according to the number of cylinders (IE 1-4, 1-5 etc). Failure to do so and incorrect installation of rod end caps is the number one cause of the rods failing to freely rotate on the crank shaft. Should the caps be mixed up either through orientation or the swapping of end caps between rods, there may be a charge of £100+vat from ourselves to correctly re-align them.
- The fit of the pin in the small end should be checked. Although the small end is honed to suit most makes of pin there may be some that are too tight e.g. coated pins. In these cases the small end should be honed to suit your pins. Clearances are typically 0.0005 to 0.00075 x nominal pin diameter. Clearance should be no more than 0.02mm (0.0008").
- The connecting rods are balanced end to end to a tolerance of +/- 2 grams across the set. This tolerance has been found to be a good compromise between cost and what is required for a fast road or mild competition engine. If more accurate balancing is required please contact P.E.C for more information. All machining tolerances are to OEM specifications.
- After all checks and any balancing/machining operations have been carried out the connecting rods should be checked over for burrs. These should be removed with a suitable de-burring tool or small file. It is also worthwhile removing the sharp edge at the cap joints with a small needle file or stone. This is to prevent shaving any material off the back of the bearings during installation.
- The connecting rods should be thoroughly cleaned of all debris, swarf, burrs, etc. and protective oils. Pay particular attention to the bolt threads. Any debris left in the threads will affect the tightening of the bolts. After cleaning, coat the side of the connecting rod big end with layout dye and scribe the cylinder numbers on both the rod and caps to prevent the caps getting mixed up.

- Always note the original bolt lengths on the table overleaf to check their suitability for reuse during engine rebuild.
- Before installation fit the piston onto the connecting rod and check there is sufficient clearance between the small end and the piston underside for full movement. On some pistons it may be necessary to modify the piston underside to gain full movement. During engine assembly the bearings should be installed in a clean and dry big end bore. Clean oil or assembly lube should only be applied to the bearing surface or crank pin before assembly. Make sure everything is clean: foreign debris is the biggest cause of bearing failure in rebuilt engines. A dummy build of the short block should be carried out to check that the crankshaft, connecting rods and pistons all move correctly. On some engines it may be necessary to machine clearance notches in the block for the connecting rod big ends.
- Liberally coat the bolt thread and bolt under head area with the supplied lubricant.
- Tighten bolts in one gradual pull. Do not tighten in steps.
- P.E.C always recommends using a stretch gauge to tighten connecting rod bolts.

3/8" x 1.5" UHL ARP2000 Bolts

Stretch 0.0055" – 0.0060" (0.1397mm – 0.1524mm)

Torque 55lb-ft with ARP Ultra-Torque Assembly Lube

5/16" x 1.5" UHL ARP2000 Bolts

Stretch 0.0050" – 0.0055" (0.1270mm – 0.1397mm)

Torque 30lb-ft with ARP Ultra-Torque Assembly Lube

Please note that if a blister pack of bolts has been supplied with the connecting rods the enclosed washers should not be used.

Rebuild Time

During engine rebuild measure the uninstalled length of the bolts and compare to the original lengths. If the bolt has elongated by more than 0.001" (0.0254mm) replace bolt before fitment. It is recommended to immediately grind a flat on the threads of the over stretched bolts to prevent accidental reuse.

PVD TOP RINGS - TURBO APPLICATIONS

Wössner are now utilising a new kind of top piston ring that has been treated with a process called Physical Vapour Deposition, or PVD for short. PVD treated rings offer the following benefits:

- A harder surface finish for the rings increasing durability.
- A better tension on the top ring without having to increase thickness.
- Exceptional scuff and wear resistance extending service life.
- PVD coating reduces friction while adding hardness and toughness.
- Included on all Wössner piston kits where noted at no extra cost.*

*Ring packs ending in XPY.

TERMS & CONDITIONS

1. General

The following conditions apply exclusively to our offers, deliveries, repair and other services. Differing terms of the customer, which we do not recognize exclusively in writing, are not binding for us, even if we do not expressly contradict you.

2. Contract conclusion and content

2.1 We reserve the right to accept contractual offers for a period of three weeks. Our offers are free.

2.2 Subsequent agreements, reservations, amendments or additions to this contract require their written form to be effective.

3. Prices and terms of payment

3.1 Our prices are exclusive of packaging and shipping. If the costs for our calculation are increased between contract conclusion and delivery, we are entitled to a reasonable price increase against merchants. This applies to non-merchants only if there is more than four months between contract conclusion and delivery and if the price agreed with the customer does not increase by more than 3%.

3.2 A cost estimate is only binding if it has been issued in writing. If no quotation is submitted to a quotation, we are entitled to charge the customer a reasonable remuneration for our work.

3.3 Payments are due within one week after the invoice has been issued and must be paid in German currency without any deduction.

3.4 When dispatching the goods, we reserve the right to deliver against advance payment or cash on delivery.

3.5 If we have several outstanding receivables against the customer, his payments will be charged in accordance with §§ 367 para. 1, 366 para 2 BGS.

3.6 In the event of a delay in payment, we shall be entitled to demand default interest at the rate of 2% above the discount rate of the Deutsche Bundesbank without prejudice to the assertion of further damage.

4. Delivery times and dates

4.1 Delivery times and working times are only binding if they have been agreed in writing.

4.2 If we fail to meet a bindingly agreed delivery date, the customer is entitled to set us an appropriate, at least three-week grace period with refusal to refuse acceptance. The customer can only withdraw from the contract after the expiry of this period. Cancellation and withdrawal notice must be made in writing.

4.3 Unauthorized performance such as force majeure, labor disputes, material supply difficulties, official interventions, etc. – even if they occur with our suppliers – lead to a reasonable extension of the delivery period. If the performance becomes impossible or unacceptable due to such obstacles, both parties may withdraw from the contract in writing. A claim for damages from the customer is excluded in such cases.

5. Transfer of risk and dispatch

5.1 When the goods are dispatched, the risk passes to the customer as soon as the goods have been handed over to the transporter or have left our company for dispatch. If the dispatch of the goods to be dispatched is delayed for reasons beyond our control, the risk passes to the customer with the indication of readiness for dispatch. Insurance of the goods to be shipped against transport damage is only made by means of special agreements and at the expense of the customer.

5.2 In the case of shipments to us, the customer bears the risk of transport.

6. Retention of title

6.1 The delivered goods remain our property up to their full payment as well as up to the complete settlement of all our existing, in the case of transactions with Dealers also all future arising demands against the customer.

6.2 If our property is subject to the reserved goods as a result of processing, the co-ownership shall be acquired in the new case in the proportion of the value of the reserved goods to the value of the third-party goods used.

6.3 The customer is entitled to resell the reserved goods in the ordinary course of business. In this case, he assigns to us all claims resulting from the resale. We will release these claims at the customer's request insofar as they exceed our claims against the customer by more than 20%.

7. Right of revocation and revocation

Consumption have the following right of revocation:

Cancellation

Withdrawal

You have the right to revoke this agreement within a period of fourteen days without giving reasons.

The period of revocation shall be fourteen days from the date on which you or a third party you designate, which is not the carrier, has or has taken possession of the goods.

To exercise your right of revocation, you must:

Wössner GmbH
Konrad-Zuse-Strasse 2
D- 79576 Weil am Rhein

Phone. +49 (0)7621 – 956649 – 0
Fax +49 (0)7621 – 956649 – 25

info@woessner-kolben.de

by means of a clear statement (for example, a letter, fax or e-mail sent by mail) about your decision to revoke this contract. You can use the enclosed sample revocation form, but this is not required.

In order to keep the revocation period, it is sufficient that you send the notification of the exercise of the right of revocation before the end of the revocation period.

Consequences of revocation

If you revoke this agreement, we will pay you all the payments we have received from you, including the delivery costs (except for the additional costs resulting from the fact that you have chosen a different type of delivery than the most favourable standard delivery offered by us) within a period of fourteen days from the date on which the notice of revocation of this contract has been received by us. For such repayment, we will use the same means of payment as you have used in the original transaction, unless you have expressly agreed otherwise; in no case will you be charged for these repayment fees. We may refuse repayment until we have returned the goods or until you have proved that you have returned the goods, whichever is earlier.

You must return the goods to us immediately or in any case no later than fourteen days from the date on which you inform us of the revocation of this contract. The deadline is respected if you send the goods before the end of the period of 14 days. We bear the cost of returning the goods. They shall only be liable for any loss in value of the goods if this loss of value is attributable to the handling of the goods which is not necessary to check the quality, characteristics and functioning of the goods.

For returns please use the following address:

Wössner GmbH
Konrad-Zuse-Strasse 2
D- 79576 Weil am Rhein

Phone. +49 (0)7621 – 956649 – 0
Fax +49 (0)7621 – 956649 – 25

info@woessner-kolben.de

You may make use of your return authorization if the following points are met:

- The product is in the original packaging and is in the same condition as it was shipped with its original label.
- The article is complete.

8. Warranty

8.1 Obviously defective or incomplete goods shall be reported by the customer without delay. The complaint must be received by us no later than 7 days after receipt of the goods. The further obligation to investigate and notify commercial customers is governed by statutory provisions. Any complaint about the goods shall be made in writing, accompanied by a copy of the invoice.

8.2 No complaint shall be deemed to constitute partial services designated as such, to which we are entitled to a reasonable extent. No defects are deviations from the agreed upon or from the advertisements or catalogues of the goods, which leave the fitness for the usual or contractual purpose untouched or improved. We reserve the right to make amendments to the listed specifications without notification.

8.3 Our engine, tuning and other accessories are mainly supplied without TÜV-certificate and are only intended for racing purposes. The admissibility of their use on public roads is not part of the contractual nature.

8.4 The warranty for delivered goods is, at our option, limited to rework or replacement delivery. In the case of failure of the repair or replacement delivery, the customer may, at his option, demand a reduction of the remuneration or cancellation of the contract. We are entitled to at least two rectification attempts.

8.5 If the defect that occurs is due to improper handling, repair attempts, damage or other changes of the goods by the customer or third parties, there is no warranty obligation. In particular, any warranty claims on the part of the customer are void if the installation instructions enclosed with the goods are not strictly adhered to.

8.6 In the case of commissioned work according to the customer's requirements, we only guarantee for proper execution of the workmanship. The customer bears the risk of technically caused malfunction or durability.

8.7 If we find in the case of a complaint that we are not subject to warranty, we can demand reasonable remuneration from the customer for incurred material and time expenditures.

8.8 The warranty period is six months.

9. Liability

9.1 Contractual pre-contractual and non-compliant claims for damages with the exception of claims for lack of assured characteristics are excluded, as long as we have not caused the damage deliberately or grossly negligently.

9.2 In the absence of assured characteristics, we shall not be liable for consequential damages, unless the warranty should be protected just before the occurrence of such consequential damage.

9.3 In addition, our liability to merchants for the reasonably foreseeable, contract-typical average damages up to ten times the purchase price b.z.w. If the customer has not informed us in writing of any extraordinary damage risks before conclusion of the contract and we have declared in writing the assumption of these risks.

9.4 We shall not be liable for damages resulting from non-compliance with the installation instructions (clause 7.5) or compliance with customer specifications (clause 7.6).

10. Final provisions

10.1 The place of performance is 79576 Weil am Rhein. In the case of transactions involving full-time purchasers, legal persons of public law or public special funds, the court of jurisdiction for all disputes arising in connection with this contract is 79576 Weil. The same shall apply if the client's domicile or habitual residence is unknown at the time the complaint is lodged,

Foreign countries.

10.2 This contract is governed by German and UK law. ECG and UN purchase rights do not apply.

10.3 Should individual parts of this contract be or become invalid, this does not affect the validity of the remaining contract.
